INSTRUCTIONS FOR FORMAT/STYLE OF MANUSCRIPT

**PLEASE NOTE THAT FORMATTING STYLES HAVE CHANGED FROM PREVIOUS YEARS.
READ ALL INSTRUCTIONS COMPLETELY AND CAREFULLY BEFORE PROCEEDING.**

The electronic version of **MicroTAS** Conference Proceedings will be created from the PDF file supplied by you. It is very important that all papers be consistent and uniform throughout the Conference Proceedings. Please use the following style indicated below to allow us to maintain uniformity in the final copy of the Conference Proceedings. **A sample paper is included and is also available on the MicroTAS website.**

INSTRUCTIONS (these parameters must be adhered to):

- Your paper format and style **MUST** match the template exactly to ensure inclusion in the Proceedings.
- The manuscript that you prepare will be used and printed as it is received.
- The electronic Proceedings will be in color. There will not be a printed version of the Proceedings.
- Because the Proceeding publication will be electronic, please feel free to use active hyperlinks in your manuscript.
- The manuscript length is **up to three (3) pages** of text and figures.
 - Longer papers will be printed only if accompanied by payment of a mandatory over-length charge of \$250 per page.
 - The absolute maximum length with payment of the over-length charge is six (6) pages.
- Do **NOT** number your pages.
- Do **NOT** password protect your PDF file.
- All fonts **MUST** be embedded.

FORMAT AND STYLE

Please refer to the Template and Sample Manuscript in conjunction with these guidelines.

- Please have a close look at the template that is accompanying this document. Your paper format **MUST** match the sample by style and format. All papers will be reviewed and those that do not **MATCH** the format will be rejected and returned for correction. Please pay attention to the guidelines and prepare them correctly the first time.
- Please check that the 8.5” x 11” page size converted correctly for your computer. Some computers do not convert the page size automatically. *Hint:* you may need to change your printer default settings to 8.5” x 11”. Just printing the PDF with 8.5” x 11” settings from Microsoft Word may not work.
- Please also check that your final PDF file is 8.5” x 11”. You may need to adjust your PDF creator settings.
- Font: **Times New Roman ONLY** for all text and the **Symbol Font** for symbols
- Paper Size: 8.5” x 11” Paper: Create all pages to be 8.5” x 11” page size
A4 Paper: Create a special size document in document set-up:
21.59 cm x 27.94 cm. For unit conversion: 1 inch = 2.54 cm
- Paper Margins: 1” (2.54 cm) for the left margin
1” (2.54 cm) for the right margin
1” (2.54 cm) for the top margin
1” (2.54 cm) for the bottom margin
- DO **NOT** NUMBER PAGES, we will add page numbers after all the manuscripts are in place.
- Do not overcrowd and create an unreadable paper by making the lettering or the spacing too small in the text.
- No text, figures, charts or tables should fall out of the text page area.
- The paper title, authors’ names and affiliations need to be centered.
 - **Title:** Bold in Times New Roman; Font size –14 point; Type – all UPPER CASE
 - **Author(s):** Bold in Times New Roman; Font size – 12 point; Type – Upper/Lower Case. Give all authors’ names - do not use et al.
 - **Affiliation(s):** Italic in Times New Roman; Font size – 12 point; Type - Upper/Lower Case.
- When authors are from more than one institution, use ¹superscripts for the corresponding institution. Please only use the actual name of the institution and **NOT** your Department, Center or Laboratory.
- When you have more than one author, please add “and” before the last author.
- Do not split words in the paper title (i.e., NANOCHANNELS should not be split so NANO- is on the first line and CHANNELS on the next line).

- Do not split author names (i.e. T. Müller should not be split so T. in on the first line and Müller on the next line).
- As we want all papers to be uniform, please **DO NOT** include contact information at the top of your paper. Contact information should be at the end of your paper after References.

Example #1:

**FABRICATION AND EVALUATION OF 2D CONFINED NANOCHANNELS
USING FOCUSED ION BEAM MILLING**

J.P. Alarie, A.B. Hmelo, S.C. Jacobson, A.P. Baddorf, L. Feldmen, and J.M. Ramsey
Oak Ridge National Laboratory, USA

Example #2:

**SEPARATION, TRAPPING AND ANALYSIS OF BIOLOGICAL
NANO-PARTICLES IN BIOMEMS**

**M. Stelzle¹, M. Dürr¹, G. Gradl³, P. Geggier², A. Haage⁴, R. Hagedorn⁵, M. Jäger²,
J. Kentsch¹, T. Müller⁵, A. Normann⁴, and T. Schnelle³**

- The remaining body of the manuscript should be formatted as one column and should be left and right (fully) justified.
 - Two columns **will NOT** be allowed.
- Abstract: Each paper should contain an abstract not to exceed 100 words that appears at the beginning.
- Keyword list should follow the abstract.
- Major headings appear in **CAPITAL LETTERS** (11 point bold) left justified, and bold and should **NOT** be numbered.
- You should try to structure your manuscript in the following major parts: ABSTRACT, KEYWORDS, THEORY (if applicable), EXPERIMENTAL, RESULTS and DISCUSSION, CONCLUSION, ACKNOWLEDGEMENTS (if applicable), REFERENCES, and CONTACT. There should not be any blank space after the section header and before the start of the text in that section.
- All paragraphs are to be indented 0.25”.
- All text in the body of the manuscript must be typed single space and Times New Roman 11 point font.
- Do not overcrowd and create an unreadable paper by making the lettering or the spacing too small in the text.
- Do not have any “widow or orphans” either in your text, charts, or tables. In desktop publishing, widows and orphans are those words or short phrases at the end or beginning of paragraphs that are left to sit alone at the top or bottom of a column — separated from the rest of the paragraph. It leaves the reading of the information, table or chart unbalanced. Do not place the header at the bottom of one page and the text of that header on another page or the caption of the figure on one page and the actual figure on another.
- Please remember to spell check your entire paper.

- Use two spaces after periods at the end of sentences.
- Define abbreviations and acronyms the first time they are used.
- References: List and number consecutively, all references at the END of the paper. When referring to them in the text, type the corresponding reference number in square brackets [1]. Indent after the numbering .3”

- Illustrations, Figures, Charts and Tables must appear within the designated areas. Text should be 11 points, Italics. Caption and number every illustration. Figure captions should be below the figure. Table headings should be above the tables.
- All figures/tables should be placed as close to their mention as possible.
- In the figure captions and table headings, figure and table numbers should be followed with a colon “:” after them. (e.g., Figure 1:).
- Double check your sequence numbering of figures, charts and illustrations.
- Do not use very thin lines (hairline rules) in any of your Illustrations, Figures, Charts and Tables. All lines need to be .5 pt or greater. Line drawings must be made in black ink. Shading is permitted.
- Do **NOT** have your paper reference number in the body of your paper.
- All illustrations/photographs must be high quality images. No scanned copies of photos.
- Footnotes: Number the footnotes separately with superscripts¹. Place the actual footnote at the bottom of the page on which it is cited.
- DO NOT put footnotes in the reference list.
- Do NOT put footnotes in a footer. Footers must be above the 1” (2.54 cm) bottom margin
- **Re-read your paper to make sure that there are no** grammatical, spelling, or content errors. Make sure that your paper format matches the template.
